About Us

To guarantee a quality, affordable solution to our customers, EA Group have formed strong business partnerships with key manufacturers. To ensure best industry practice, our sales and engineering staff have received a high level of skills training supported by their ADSA accreditation.

EA Group aim to encompass the future requirements of an industry being set continual challenges to provide more modern and energy efficient products which perform to exacting Health and Safety regulations. We incorporate advanced operating features, multiple safety functions, and energy efficient configurations, to encompass the most demanding criteria for modern building design.

Our History

The Company was originally founded in the UK in 1983 to provide high quality automatic gate installation and maintenance in the Home Counties. In 1995 Perimeter Security (EA) Limited was incorporated as part of the Electro Automation Group of Companies to increase its product portfolio.

To consolidate the multiple disciplines Perimeter Security (EA) Limited changed its name in August 2003, amalgamating two companies into EA Group (UK) Limited.

With the acquisition of Automatic Door Maintenance Limited (ADMI) in July 2007, EA Group (UK) Limited further increased its knowledge and portfolio into the automatic door industry and incorporating our extensive experience of access control are now a major player in the supply and installation of turnstiles.

Company Profile

With its Head Office and Showroom located in Bookham, Surrey, and regional workshops and stores in Leicestershire, EA Group (UK) Limited provide a comprehensive installation and support service within the automatic door, turnstile, access control, and security market sectors.

Contract administration, project management, technical support and 24 hour, 365-day service is coordinated from Bookham.

We have worked for many years with the police and government organisations and our engineering staff are both security screened and CRB checked.

The Shard

EA MAKE AN ENTRANCE AT THE SHARD

At 310m (1,016 ft) the newest addition to the London skyline is officially the tallest building in Western Europe.

Conceived by the Sellar group, The Shard has been built in the London Bridge Quarter of the capital and is considered a world class address to be occupied by a mixture of offices, hotel, residential apartments, shops and restaurants.

After a thorough selection process, EA Group (UK) Limited, part of the Dublin based Electro Automation group of companies won the contact to supply and install 5 of their automated doors to the entrances of The Shard, including the prestigious offices on level 2 and the 5-Star Shangri-La hotel entrance situated on the ground level.

Given the prestige of the project the architect's choice for the hotel main entrance was the KA021 revolving door from EA Group.

At 3.6 meters in diameter and featuring both revolving and sliding door functionality, the KA021 door has been designed to accentuate the splendor of the entrance to the Shangri-La, one of the worlds most opulent and exclusive hotel brands.

Once again under the spotlight of a prestigious major construction project, EA Group proved that the knowledge and technical abilities of their team were able to deliver the door package on time and on budget.

The EA Group leadership team were able to demonstrate a willing flexibility to work alongside other contractors and suppliers to ensure that within some of the most demanding construction logistical environments the aspects of the project could be and were deliverable.

Robert Munday, EA Group's Managing Director said, "Being involved in such a landmark and prestigious project such as The Shard has been a thrilling experience for our team and EA Group as a whole. Our contribution to this project will be on show to the admiring public who visit The Shard for decades to come. We feel privileged that we have been involved".

Faculty of Health Building, Robert Gordon University, Aberdeen, Scotland

RGU Aberdeen

EA MAKE A UNIFIED ENTRANCE AT THE RGU

The specification for the Robert Gordon University, Aberdeen called for two manual revolving doors to the entrance of their Faculty of Health building.

With experience of students and manual revolving doors, the university were specific in detailing that the new doors must have a proven and effective speed control device incorporated into the door mechanism to prevent students 'spinning up' the door mechanism.

With a broad multi-national intake of students from around the world, it was important that the door mechanism and speed controller would not malfunction or fail if the doors were rotated clockwise or anti-clockwise.

Students from the far-east turn their revolving doors clockwise whereas students in the UK and Europe turn anti-clockwise.

EA Group's KM023 manual revolving doors with EA-SC01 manual speed controllers were chosen above the competition as the perfect solution for RGU Aberdeen.

In addition, another part of the exacting key criteria was the provision for a discreet but efficient air curtain to be incorporated into the internal head of the door with curved plenum and outlet vents.

The discreet air curtain was another element of the specification that EA Group won the project over the competition and the installation at RGU proved once again that EA were the market leaders in providing high quality revolving doors with key bespoke design features.

The Forum Building, Exeter University, Exeter, England

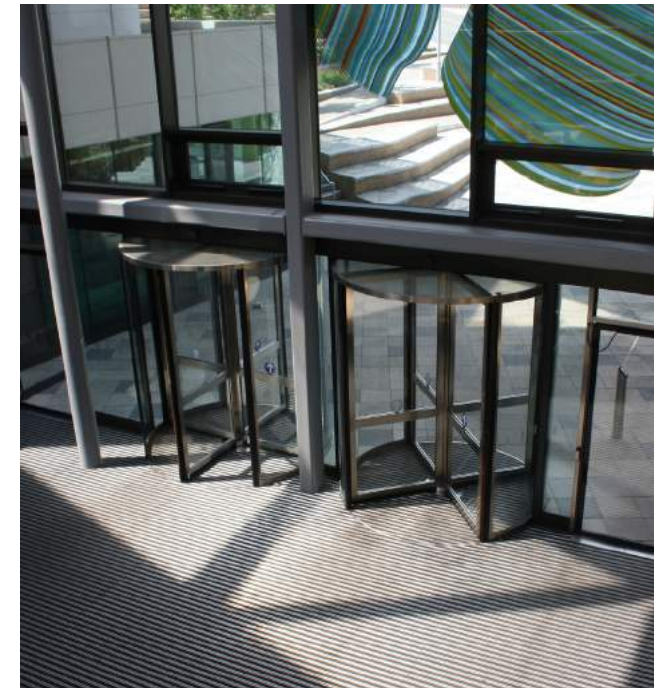

Exeter Forum

EA PROVE THEIR VERSATILITY WITH HYBRID DOORS

The Forum is the centre focus point of learning at Exeter University. The hub for study, shopping, and social interaction, the Forum building is without doubt the busiest on the entire campus.

EA Group supplied a hybrid door solution for the three revolving doors for this prestigious learning centre. Manual revolving doors made predominantly from glass to match the facade of the building, yet also incorporate metal framed door leaves that would withstand the pressures put upon them in a busy student thoroughfare.

The benefits of the clear glass canopy and outer door drum of our KM071 incorporated with the framed door leaves of our KM023 was the answer that gave Exeter Forum the sustainability of reflective light and durability of a bustling student life.

One Springfield Drive, Leatherhead

All Glass Revolving Door

Whether a hotel, commercial building or blue-chip headquarters. The EA all glass revolving door offers a visually minimalist solution that is in keeping with the most modern façade or can blend seamlessly into a heritage building without distraction.

This UK manufactured entrance has many benefits and features:- Bespoke dimensions every time in 1mm increments for the diameter and height
Stainless steel, polyester powder coat, bronze or brass finishes. Installation can be directly to the finished floor or upon an EA base ring to receive floor finishes.
Bespoke horizontal or vertical handles in many finishes.
Shorter lead-times than most, as its is manufactured in the UK

For additional safety and comfort, our manual doors also have the possibility of underfloor speed controllers or speed control, power assist and parking functions. Again these are purpose made to each entrance and are designed and manufactured within the UK.

Accreditations

01 Description

It is our policy to continually improve our expertise and skills in delivering security and parking management solutions that satisfy our customers' needs and that cultivate customer loyalty. We achieve this by focusing our high standards on the following objectives:

- ensuring every employee is committed to meeting customers' requirements
- actively listening to our customers and taking action where appropriate
- achieving "best practice" across all activities that meet both business and customer needs.
- developing employee skills to meet the challenges of a constantly changing industry through personal development and the implementation of effective training.
- continuous improvement of what we do.
- regular measurement and review of objectives to ensure they continue to meet business needs and policy & strategy

ISO9001

The standard is based around the principles of customer satisfaction, continual improvement and the development of a process based quality management system.

ISO14001

In July 2008 following an assessment by an independent body, EA Group (UK) Limited has been awarded ISO 14001 certification. This certification has only been achieved by less than 1% of UK businesses and this prestigious award is supported by the Government and recognised world-wide.

ISO27001

ISO27001 is the new name for BS 7799. It is an internationally-recognised certificate for evaluating how an organisation securely manages its information and data. EA Group (UK) Ltd and EA Doors passed and were accredited with ISO 27001 by QMS after a multi-stage audit in March 2009 which rigorously evaluated all of our IT Systems, Data Handling and Security as part of a number of control objectives and accomplished control methods.

Constructionline

We have Constructionline accreditation, our membership number is: 125514

CHAS

EA Group have been audited and accredited with CHAS, the Contractors Health and Safety Assessment Scheme

ADSA (Automatic Door Suppliers Association)

ADSA was formed in 1985 for the purpose of ensuring that its member companies offered superior levels of safety in the supply, installation and maintenance of automatic doors.

Construction Skills (CSCS)

All of EA-Group's engineering staff are CSCS approved skilled contractors. CSCS is fast becoming the industry standard. It is supported by organisations such as the Major Contractors Group (MCG), National Contractors Federation (NCF), Major Home Builders Group (MHBG) and Civil Engineering Contractors Association (CECA) all of whom are committed to a fully qualified workforce by the end of 2010. Our major clients recognise our commitment to quality by having a 100% CSCS carded workforce. These clients include government, housing associations, NHS projects and private clients such as BAA.

Turnstiles

We also offer a range of waist-high turnstiles to complement our automatic and manual doors. Their stylish appearance perfectly harmonises with high safety and traffic flow capacity and visually they will be in accord in any modern interior providing reliable security control against unauthorised access.

Service Support

01 Service

EA Group (UK) are setting the standards and leading the industry with full service support for all types of turnstiles, access control, CCTV, intercoms, automatic gates, entrance door solutions and pay-on-foot parking systems.

02 Support

Our support centre is manned 24 hours a day 365 days a year. This is coupled with our onsite 24 hour 365 days a year service and call-out support, which is the least our contracted customers expect, so that's what we provide.

03 Maintenance

At EA Group (UK) we recognise that each and every customer is an individual with specific needs. We strive to ensure that we meet the exacting needs of each of our clients.

Maintenance Contracts are tailored to each and every site to ensure that you achieve the best level of support and service on offer to you.
